

POWERFUL  PERFORMANCE

Charge It and Forget It

NO BATTERIES | NO CORDS | NO HASSLES

Introducing a motor free of disposable batteries and unsightly cords. It needs charging roughly once a year. It's powerful enough to lift shades large and small, and yet is so low-profile and whisper-quiet, you might forget it's even there. Powered by innovative Somfy RTS technology, the Graber Rechargeable Motor is here.

And it's the must-have motor customers have been waiting for.

GRABER®

Graber Rechargeable Motor

This is the new Graber Rechargeable Motor—the first of many inspired motorization solutions launching this year. Packed with install-it-and-forget-it convenience that practically sells itself, the Graber Rechargeable Motor includes convenient features that will transform motorization from a nice-to-have into a must-have.

- **True behind-the-scenes performer**—Battery is tucked away inside a streamlined housing unit for a clean, modern profile
- **Install-it-and-forget-it convenience equals easy sales**—No hassles, no maintenance, no disposable batteries
- **Only charge once a year**—Charge in place, right on the valance. Battery will charge from 0–100% in about four hours.
- **“Alexa, close my shades!”**—Control shades with Amazon Alexa, Google Home, and many other home automation systems, thanks to Somfy RTS MyLink and IFTTT compatibility
- **Whisper-quiet operation**—An ideal motorization solution for bedrooms, nurseries, and home theaters
- **Easy turnkey installation** for dealers and technicians
- **Designed to lift shades large and small**—Powerful 12-volt motor with 1.1 Nm of torque
- **Choose from multiple remotes**—All Somfy remotes, including Graber single-channel remote, Graber five-channel remote, and Graber multi-channel remote
- **Graber Shade compatibility**—Solar and roller shades
- **Minimum shade width requirement**—25.5" or greater
